

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

1. (Currently Amended) A tumor vaccine comprising:
 - (A) a microparticle comprising a fragment of solidified tumor tissues or cells, without soluble tumor antigen from the solidified tumor tissues or cells being present in a soluble form, and said fragment being of a size so as to allow phagocytosis of the fragment; and
 - (B) at least one isolated cytokine, at least one isolated compound that is a cytokine-inducing agent, or a combination thereof.
2. (Canceled)
3. (Previously Presented) The tumor vaccine according to claim 1, which further comprises an adjuvant.
4. (Previously Presented) The tumor vaccine according to claim 1, which comprises a cytokine-controlled release preparation as the at least one isolated cytokine, at least one isolated compound that is a cytokine-inducing agent, or a combination thereof.
5. (Previously Presented) The tumor vaccine according to claim 1, which comprises a granulocyte-macrophage-colony stimulating factor, interleukin-2, or a combination thereof, as the at least one isolated cytokine, the at least one isolated compound that is a cytokine-inducing agent, or the combination thereof.

6. (Previously Presented) A tumor vaccine for use in combination with at least one isolated cytokine, the vaccine comprising, as an active ingredient, a microparticle comprising a fragment of solidified tumor tissues or cells, said fragment being of a size so as to allow phagocytosis of the fragment.

7. (Previously Presented) The tumor vaccine according to claim 6, which further comprises an adjuvant.

8. (Previously Presented) The tumor vaccine according to claim 17, which comprises a cytokine-controlled release preparation as the at least one isolated cytokine, the at least one isolated compound that is a cytokine-inducing agent, or the combination thereof.

9. (Previously Presented) The tumor vaccine according to claim [3] 18, which comprises a cytokine-controlled release preparation as the at least one isolated cytokine, the at least one isolated compound that is a cytokine-inducing agent, or the combination thereof.

10. (Previously Presented) The tumor vaccine according to claim 17, which comprises a granulocyte-macrophage-colony stimulating factor, interleukin-2, or a combination thereof, as the at least one isolated cytokine, the at least one isolated compound that is a cytokine-inducing agent, or the combination thereof.

11. (Previously Presented) The tumor vaccine according to claim 18, which comprises a granulocyte-macrophage-colony stimulating factor, interleukin-2, or a combination thereof, as the at least one isolated cytokine, the at least one isolated compound that is a cytokine-inducing agent, or the combination thereof.

12. (Previously Presented) The tumor vaccine according to claim 4, which comprises a granulocyte-macrophage-colony stimulating factor, interleukin-2, or a combination thereof, as the at least one isolated cytokine, the at least one isolated compound that is a cytokine-inducing agent, or the combination thereof.

13. (Previously Presented) The tumor vaccine according to claim 19, which comprises a cytokine-controlled release preparation as the at least one isolated cytokine, the at least one isolated compound that is a cytokine-inducing agent, or the combination thereof.

14. (Previously Presented) The tumor vaccine according to claim 13, which comprises a granulocyte-macrophage-colony stimulating factor, interleukin-2, or a combination thereof, as the at least one isolated cytokine, the at least one isolated compound that is a cytokine-inducing agent, or the combination thereof.

15. (Previously Presented) The tumor vaccine according to claim 8, which comprises a granulocyte-macrophage-colony stimulating factor, interleukin-2, or a combination thereof, as the at least one isolated cytokine, the at least one isolated compound that is a cytokine-inducing agent, or the combination thereof.

16. (Previously Presented) The tumor vaccine according to claim 9, which comprises a granulocyte-macrophage-colony stimulating factor, interleukin-2, or a combination thereof, as the at least one isolated cytokine, the least one isolated compound that is a cytokine-inducing agent, or the combination thereof.

17. (Currently Amended) The tumor vaccine according to claim 1, wherein the fragment comprises ground ~~solidified~~ tumor tissues or cells wherein soluble tumor antigen has been removed.

18. (Previously Presented) The tumor vaccine according to claim 1, wherein the fragment comprises tumor tissues or cells bound to a particle.

19. (Previously Presented) The tumor vaccine according to claim 1, wherein the fragment comprises tumor antigen bound to a particle.
